HUJI Perple_X Setup

Using this file

If you open this file in a browser the links should be enabled automatically, but in Adobe Acrobat the links may be blocked. To unblock the links, go to **Edit** -> **Preferences** -> **Trust Manager** -> **Internet Access from...** -> **Change settings** -> choose **Custom setting**, specify **www.perplex.ethz.ch**, and press the **Allow** button.

Getting started

Copy Perple_X and verify that your copy works as described at one of the following links before the course begins:

> WINDOWS user instructions
> MAC_user instructions
> LINUX_user instructions

In the above instructions, step 3 (the ability to run the programs from a console/terminal window) is worth the effort. Using Ghostview or Ghostscript to view phase diagrams and MATLAB or PyWERAMI to view 3-dimensional data is useful, but not essential. If you have problems, feel free to contact me before the tutorial.

In addition to files mentioned above, please copy huji_perple_x_tutorial.zip and extract the files in the data_files directory to your Perple_X directory.
